OMNISCENT®

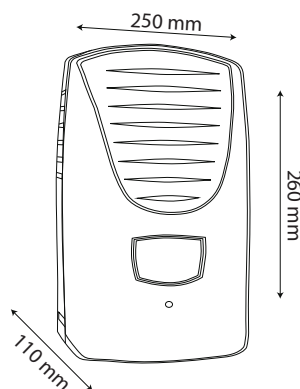

Large Area Fragrance Dispenser

AF/08 Omniscent Ozone Dispenser

Omniscent® unlike conventional aerosol fragrance systems has been designed for use in far larger areas such as hotel foyers and reception areas, conference and convention centers, retail areas and showrooms, airports and many more. The Omniscent system works by utilizing ceramic cartridge technology instead of an aerosol refill and provides the user with both control of output and intensity of fragrance. The disposable ceramic block is gently heated within the unit and fragrance is dispersed via an internal fan. This gives a large and uniform fragrance coverage over an area of up to 500m³ which is 10 -12 times that of the area covered by conventional aerosol dispensers. The ceramic cartridge blocks are biodegradable and environmentally friendly, whilst being safe to handle and easily replaceable.

SCHEMATIC

SPECIFICATIONS

- Dimensions:
260mm x 250mm x 110mm

FEATURES

- Easily replaceable
- Fragrance refill lasts up to *4 weeks
- Biodegradable ceramic plate
- Fragrance coverage of up to 500 cubic meters
- Bespoke fragrances available
- Works on vapour technology

FRAGRANCE OPTIONS

The disposable ceramic block is gently heated within the unit and fragrance is dispersed via an internal fan. The ceramic cartridge blocks are biodegradable and environmentally friendly, whilst being safe to handle and easily replaceable. Available fragrances: Forest Glade, Passion and Roasted Coffee.

AF/05 Prozone Ozone Generator

Airborne microorganisms are a common source of respiratory infection and are of particular threat to people with asthma. Some serious infectious diseases can be easily spread by airborne micro-organisms. In nature air purification is produced by the action of high energy discharges in lightening on oxygen, creating O³ within the atmosphere. The air purification service from Hygiene Systems recreates this natural process. The purified air produced destroys harmful micro-organisms with which it comes into contact and breaks down malodour causing compounds neutralizing the unpleasant smells they produce. Because the purified air is a gas it penetrates to even the most inaccessible locations. The process leaves no chemical residue, all 'unused' purified air reverts back to oxygen within a short time. Prozone® ozone generator cleans, rejuvenates and refreshing the air in your office, home or healthcare environment.

SCHEMATIC

SPECIFICATIONS

- Dimensions: 210mm x 135mm x 85mm
- Capacity: Adjustable settings to match room sizes up to 150m³
- Material: Fire retardant ABS

AF/10 Prozone Ceramic Plate

BENEFITS

- Destroys 99.5% of airborne viruses and bacteria
- Ideal for healthcare locations
- Eliminates unpleasant smells
- Environmentally friendly

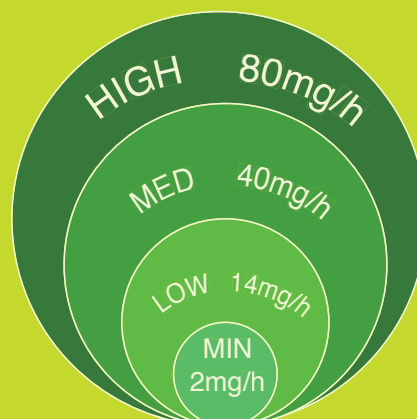

SUMMARY

"Activated oxygen" is produced by bringing the air we breathe into contact with a high voltage electrical discharge. An ozone generator mimics nature by creating a natural freshness often associated with electrified air after a thunderstorm.

FEATURES

- Programmable settings and timer with a safety "cut off" switch
- Quick installation
- Wall mounted or free standing option
