TREATMENT FOR SEPTIC TANKS AND PORTABLE TOILETS

Innu-Science

Nature Powered

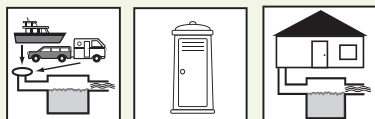

Description

Nu-Sept™ is a biotechnology-based product for treating septic tanks and portable toilets. It helps reduce common problems in disposal fields such as bad odours, blockages and poor drainage. It also helps liquefy organic matter in portable toilets.

Applications

Nu-Sept™ is ideal for treating residential and commercial septic tanks. It is useful for treating all sanitary facilities that are not connected to the municipal system. It is also highly effective at treating portable toilets used at construction sites, fairs and outdoor public sites. **FOR PROFESSIONAL USE.**

Directions

Nu-Sept™ comes ready to use. For treating septic systems, it can be poured directly into the toilet. For portable toilets, it is added to each waste tank during preparation for initial use.

Treating septic tanks: ① Pour the dose of **Nu-Sept™** in the toilet bowl then flush.

Treating portable toilets: ① Empty and clean the tank of the toilet. ② Add the amount of water specified in the instructions. ③ Pour the dose of **Nu-Sept™** directly in the tank. ④ Add another dose two days later if necessary. ⑤ At every visit, spray three to four squirts of **Nu-Smell Plus™** on the floor.

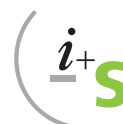

DILUTION TABLE	RESIDENTIAL SEPTIC TANKS:	COMMERCIAL SEPTIC TANKS:	PORTABLE TOILETS:
	Preventive Treatment: (Healthy systems that work properly)	Preventive Treatment: (Healthy systems that work properly)	Initial treatment: 200 to 600 ml of Nu-Sept™ in the tank
	Dose: 1 to 2 L of Nu-Sept™	Dose: 2 L of Nu-Sept™	
	Frequency: 3 months	Frequency: 1 month	
	Restorative Treatment: (Aging, problematic systems)	Restorative Treatment: (Aging, problematic systems)	Top-up treatment: 100 to 200 ml of Nu-Sept™ in the tank
	Dose: 1 to 1.5 L of Nu-Sept™	Dose: 4 L of Nu-Sept™	
	Frequency: 1 month	Frequency: 1 month

TREATMENT FOR SEPTIC TANKS AND PORTABLE TOILETS

Cleaning tips

If the disposal field is not draining properly and water is backing up into the building, consult a specialist immediately ■ Start the **Nu-Sept™** treatment when wastewater is draining properly ■ For commercial systems, ensure good management of solids and grease at the source ■ Limit the use of disinfectants; they impair the proper functioning of septic systems ■ Never mix products.

Respect for the environment

Tips for being greener

Do not use formaldehyde-based products or fragrances to try to mask odour problems ■ Never use chlorinated cleaners or products (bleach) ■ Do not use disinfectants to try to resolve hygiene and odour problems ■ Train staff on the environmental impact of their work.

Environmental benefits

Controls odour problems without the need for harmful chemical products ■ Safe for pipes and septic system: helps systems work better and last longer.

Fits perfectly into any organization's efforts to be more eco-responsible by going green.

Technology

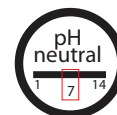

The technology behind **Nu-Sept™** is based on natural bacterial cultures that are specially selected to quickly decompose organic matter, maintaining a healthy bacterial flora in septic tanks. By preventing the growth of bacteria that produce hydrogen sulfide (H₂S), our bacterial cultures prevent conditions such as foul odours and improper functioning of the septic tank. When organic matter is broken down faster and the septic system is healthier in general, both the tank and the disposal field can achieve peak operating conditions.

Composition

<5% non-ionic surfactants, bacterial cultures, dye, fragrance, preservative.

Properties

Blue liquid, mint scent.

Regulatory compliance

Regulation (EC) No 648/2004 on Detergents

Directive 1999/45/EC and Amendments on Dangerous Preparations

Regulation (EC) No 1907/2006, Annex II on Safety Data Sheets

REACH Regulation (EC) No 1907/2006

This preparation is not classified as hazardous according to European Directive 1999/45/EC and its amendments. Not regulated by the regulation on transport of dangerous goods.

Material safety data sheet available upon request. Read it before using this product.

Safety phrases: S25 - Avoid contact with eyes. **S26** - In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
